## Farmers, Look Here!

He manufactures *Ball & Post's CULTIVATOR*,  
a new article patented April 6th, 1852, to which he  
would call the attention of agriculturists. As a la-  
bor-saving machine, it is capable of doing double  
the amount of work of any ordinary Cultivator.—  
This implement has two long shares, one on each  
side, constructed of steel, and fastened on the mould  
boards in such a manner as to move the entire sur-  
face of the ground, thereby cutting all roots and  
weeds that come in contact with the shares which  
may be graduated by the clevis to run from two to  
six inches in depth.

The three small plows attached to the shares an-  
swer the same purpose of the common tooth culti-  
vator, and in addition to the shares and plows, is a  
metallic blade rake attached to the rear of the Cul-  
tivator, which serves to cut and break up the sod  
and hard lumps, leaving the earth in a fine and pul-  
verized condition. The effectiveness of this cultivator  
renders second hoeing unnecessary, which is a  
saving of time and labor.

Mr. Perrin also manufactures a larger sized ma-  
chine, constructed upon the same principle as the  
above, but with larger shares, and containing two  
small plows in addition to the corn cultivator, which  
is designed to put in grain, and working upon sum-  
mer fallows. They are light, and of durable con-  
struction, readily handled out of easy draught.

This CULTIVATOR obtained the first premium at  
the Ohio State Fair, held at Cleveland in Sept., 1852.
